

## HYDRO TANK SERVICES

### Fire & Potable Water Tanks Design & Installation, Inspection, Maintenance & Repair

At Hydro Tank Services we offer a variety of services from design and installation to inspection and maintenance for both fire and potable water tanks.

Our skilled technicians are specialists in this field, with many years in the industry to assist you. We, along with our parent company Hydro Pump Services, have the capability to provide a comprehensive service and package that can address all things pump and water storage related.

### Design & Installation

We design our Fire and Potable water tanks using a range of materials such as galvanized steel, and even stainless steel to suit any environment. We can even design liners to be fitted to precast concrete tanks!

HTS tanks are designed and built in compliance with Australian standards and customised to your requirements. With a combined experience of over 30 years in the industry, HTS can design and construct your tank to fit any unique space in pre-existing structures.

*Tanks designed and constructed to  
AS 2304-2019, AS 3005.1-2021, AS 1319-1994  
and AS 1657-2018*
